OBJECTIVE

With around 3.5 years of experience as a UX designer, I have successfully worked on product journeys from conceptualisation to feature launch. Core strengths are in user research, data-driven design solutions supported by skills in product strategy, wire framing, prototyping, user interviews and A/B testing. Additionally, my 4 years of experience in architecture have honed my ability to align with revenue growth.

EXPERIENCE

Adani Digital Labs (Trainman, 13M+ Downloads), Gurgaon - Senior UX designer

Feb 2022 - Present

- Revamped post-payment user flow by performing competitor analysis, card sorting, user interviews leading to a 15% reduction in drop rates.
- Created a chatbot flow, conducted user interviews, created information architecture, flow charts, did A/B testing, prioritized user issues by card sorting resulting in a 30-40% decrease in support calls.
- Designed "Trip Assurance" and "Alternate Confirm seats" pioneer features. Performed competitor analysis, did primary and secondary research. Developed Journey maps, prototypes, Increased company revenue by 15% through this feature.
- Designed 'Free Cancellation scheme, resulting in a 12% to 18% increase in conversion. Added Gamification for referral program
- Improved booking funnel user experience by performing competitor analysis, heat map analysis, user research and user interviews.
